## ABOUT AMP | HOW TO GET INVOLVED?

### About AMP

The Association for Molecular Pathology (AMP) was founded in 1995 to provide structure and leadership to the emerging field of molecular diagnostics. AMP's 2,300+ members include individuals from academic and community medical centers, government, and industry; including pathologist and doctoral scientist laboratory directors; basic and translational scientists; technologists; and trainees.

Through the efforts of its Board of Directors, Committees, Working Groups, and members, AMP is the primary resource for expertise, education, and collaboration in one of the fastest growing fields in healthcare. AMP members influence policy and regulation around the globe, ultimately serving to advance innovation in the field and protect patient access to high quality, appropriate testing.

### Mission

The Association for Molecular Pathology is a not-for-profit scientific society that advances the clinical practice, science, and excellence of molecular and genomic laboratory medicine through education, innovation, and advocacy to enable highest quality health care.

### How to Get Involved

AMP is the premier organization representing the needs and interests of the international molecular diagnostics community. AMP members receive a host of valuable benefits including access to our official publication, *The Journal of Molecular Diagnostics*, discounted registration fees for AMP sponsored events, instant access to experts in the field through AMP's Members-Only community CHAMP, free access to many online learning materials, and a wide-variety of other resources and opportunities. Join the global community of molecular pathology professionals and make AMP your professional home! To join visit: [www.amp.org/join](http://www.amp.org/join)

## AMP GLOBAL 2017

### Global Congress on Molecular Pathology

## Diagnostic Technologies and Clinical Applications

*Advancing Patient Care Through Molecular Medicine*

**April 3-5, 2017**

Estrel · Congress & Exhibition Center  
Berlin, Germany

[www.amp.org](http://www.amp.org)

The Association for Molecular Pathology (AMP) is pleased to invite you to join us for the inaugural AMP 2017 Global Congress on Molecular Pathology: Diagnostic Technologies and Clinical Applications, in Berlin, Germany, April 3-5, 2017.

A multi-disciplinary scientific program showcases molecular technology with clinical applications in oncology (solid tumors, hematopathology), genetics (congenital, heritable), and infectious diseases.

Importantly, there is an emphasis on modern, user-friendly laboratory analytics supported by informatics tools to facilitate interpretation of actionable genomic test results. The Global Congress brings together a network of molecular professionals and representatives of the diagnostics industry to educate healthcare practitioners and to advance the value of molecular laboratories in providing high quality patient care around the world.

AMP is the premier organization representing the field of molecular diagnostics worldwide. AMP members can be found in 43 countries and are dedicated to advancing molecular medicine around the world.

**Plan now to join us in Berlin!**

### Organizing Committee Chair

**Margaret L. Gulley, MD**  
University of North Carolina School of Medicine  
Chapel Hill, North Carolina, USA

### AMP 2017 President

**Federico A. Monzon, MD**  
Castle Biosciences  
Houston, Texas, USA

## TARGET AUDIENCE

- Lab Professionals  
(Directors, Researchers, Supervisors, Managers)
- Clinicians  
(Oncologists, Geneticists, Infectious Disease and Primary Care Physicians)
- Molecular/Medical Technologists and Doctoral Trainees

## TOPICS

- ⚙️ **Cross-Cutting Sessions on Emerging Diagnostic Technologies:**
  - Liquid Biopsies
  - Small or Degraded Specimens
  - Informatics
  - Microbiome
  - Quality Assurance
- ⚙️ **Focused Discussions on Molecular Pathology in:**
  - Cancers
  - Inherited Conditions
  - Infectious Diseases
- ⚙️ **Practical Short-Courses in:**
  - Next-Generation Sequencing
  - Clinical Informatics Pipeline
  - Clonal Evolution and Heterogeneity
  - Emerging Technologies
- ⚙️ **Industry Workshops & Exhibits**
