

# 3<sup>rd</sup> NordiQC Conference on Applied Immunohistochemistry

June 6<sup>th</sup> - 9<sup>th</sup> 2017, Aalborg Congress & Culture Centre, Aalborg, Denmark

In collaboration with the International Society for Immunohistochemistry and Molecular Morphology

The conference is dedicated to international standardization of immunohistochemistry (IHC) and related molecular based techniques for tumour classification and precision medicine. Special emphasis will be given on an up-to-date pathological approach to new diagnostic and predictive biomarkers (including immune checkpoint inhibitors) particularly in tumours of lung, lung, digestive system, kidney, urinary and genital tracts, and soft tissues. Issues of IHC protocol optimization, selection of antibodies, selection and interpretation of positive and negative controls, and external quality assessment (EQA) will be highlighted.
