

Welcome to the 50th anniversary of the French Society of Clinical Cytology

*Looking at the Past and into the Future
of Cytopathology*

22th November 2017
Convention Centre “Palais des Congrès”, Paris, France

Dear Colleagues,

On behalf of the organizing committee, I am delighted to invite you to the 50th anniversary of the French Society of Clinical Cytology meeting, to be held on 22 November 2017, at the Palais des Congrès in Paris, France. The scientific meeting, hosted by the French Society of Pathology (SFP), will, we hope, attract a wide audience whatever their background or interest in the field of cytology, from Europe and beyond. It will be an opportunity to learn new developments, share best practices, refresh our skills but also to reunite with old friends.

The scientific program (limited to the afternoon), will cover different aspects of cytology, with sessions covering morphology, best practice, guidelines, and new techniques.

The meeting will take place in the “Palais des Congrès”, a strategic location in Paris and one of the world’s most significant Congress Center with a wide range of nearby hotel accommodation.

A gala evening will be held, with in beginning a comedy “l’Avare”(“ The Miser”) from Moliere, played at the Ranelagh Theater. Molière whose real name was Jean Baptiste Poquelin composed 12 of the most satirical and durable comedies of all time, including “L’Avare”, (French). It is a five-act comedy first performed in 1668, in the theatre of the Palais-Royal in Paris. The miser of the title is called Harpagon, a name adapted from the Latin harpago, meaning a hook or grappling iron. He is obsessed with the wealth he has amassed and is always ready to save expenses. You will attend a modern, unconventional version of this play performed by the “Grenier de Babouchka” troop. As the play starts, a state-of-the-art English subtitles or “surtitles” will be projected just above the stage; it’s as easy as reading subtitles for a movie. A glossy printed program will serve as a souvenir! A cocktail party will then be served in the foyer and galleries of the theater.

Paris is well known for fashion, culture, food and entertainment. It benefits from a very convenient public transportation system which includes the metro and the bus, but do not hesitate to rent the Velib bikes to discover the whole city, enjoy the banks of the Seine and all the Parisian jewels. Also take time to have a drink in the many Parisian cafés. Victor Hugo said that “Respirer Paris, cela conserve l’âme”, that you can translate as “Breathing Paris preserves your soul”, and Hemingway wrote “A moveable feast”, translated in French as “Paris est une fête”. As all the Parisians who love their beautiful city, we are convinced that this meeting will not only be scientifically exciting but also that you will fall in love with Paris.

We look forward to welcoming you to Paris for this exciting and festive 50th anniversary of SFCC !

Social Events: Gala Evening (Nov. 22, 2017, (8h15– 11h00 pm), Play and Diner cocktail, Ranelagh Theater

The theater will welcome you from 8:15 pm. It is located 2 steps from the Eiffel Tower and the Maison Radio France: Theater of Ranelagh, 5, rue Vignes, 75016 Paris. The play will start at 8:45 pm (be on time), « smart casual ».

Located outside the city limits at the time, a theatre was built in Château de Boullainvilliers belonging to Alexandre Le Riche de La Pouplinière, a great patron of the arts. Intellectuals and artists such as Voltaire and Rameau visited the theatre. After the Revolution left the property partially devastated, a famous automobile manufacturer and music enthusiast, Louis Mors, acquired the land and had the original theatre reconstructed on the site of the original La Pouplinière Music Hall in 1894. The rich and warm carved oak panelling that adorns the venue in a Neo-Renaissance style gave the room exceptional acoustics, and remains to be a cinema of art and essay today. Here in this cozy theatre. (5 rue Vignes 75016)
 Step into the grand auditorium of the Theater of Ranelagh, and prepare to be wowed by the ornate carved oak panelling adorning the orchestra and balconies, as well as the intricately decorated ceiling. Looking around you it's not hard to believe that this building is listed as one of Paris' 'historical monuments'...

Comedy

'Molière in 'The Miser'' takes us through the last 15 years of the protagonist's chaotic and difficult life, introducing us to the women he loved, the friends he valued and, of course, the enemies he loathed. Also showing us various notable encounters such as that with King Louis XIV, the one-man show takes us right up to the end, examining the strange circumstances surrounding Molière's death...
